Education

Augustana College **Feb 2023 – Dec 2026**
B.A. in Data Science & Neuroscience *Rock Island, IL*

Dean's List (Fall 2024 – Spring 2026) | Best Insight / Best Data Visualization, ASA Inter-College Competition (2025)

Technical Skills

Languages & Frameworks: Python, SQL, Java, JavaScript, TypeScript, React
ML & Data: scikit-learn, pandas, NumPy, feature engineering, model evaluation (ROC, precision/recall), Databricks (Azure)
Tools: Git/GitHub, Supabase (Postgres), Vercel, Tableau, Power BI, Jupyter

Experience

Data Analyst **Mar 2025 – Present**
John Deere *Moline, IL*

- Built an AI tool that rewrote product names and descriptions into clearer, more consistent versions in English and six more languages, lifting sales about **42%** on the cleaned-up catalog.
- Drove a supplier-transition decision that saved about **$2.2M**, modeling overstocked inventory with **Python** and **SQL**.
- Cut manual part-number search time by **80%** by automating lookup with **SQL** and **Databricks**, reducing support tickets.

Data Science Intern **May 2026 – Aug 2026**
Institutional Research *Rock Island, IL*

- Built a predictive model that forecasts student academic outcomes with **85%** accuracy, flagging **300+** at-risk students early for targeted support.
- Cut data-prep time by **60%** by consolidating fragmented student data into a centralized cloud pipeline.
- Presented findings live to the College President and executive leadership; the report directly informed funding decisions for student organizations and support initiatives.

Product Manager & Analyst **May 2025 – May 2026**
OSL *Rock Island, IL*

- Built a self-service club directory and join feature, replacing a manual email-list process and driving a **68%** increase in new freshmen joining clubs.
- Increased event participation by **47%** by giving students one place to discover what was happening on campus.
- Saved about **$20,000** through more efficient budget allocation, using real attendance data to guide spend.

Projects

Nibbles (Social Reading Tracker) | React, TypeScript, Supabase, Vercel

- Solo-built a full-stack social reading-tracker app with circles, ratings, and streak mechanics, now used by **57** real people.
- Engineered a personalized recommendation engine on the **Open Library API** backed by **Postgres** row-level security.

CampusEX (Campus Marketplace) | React, JavaScript, SQL

- Co-founded a student marketplace serving **500+** users, building **React** front-end features and the listings/transactions data model.
- Instrumented product analytics (funnels, retention, activity) to guide feature decisions, improving onboarding by **65%**.

Honors & Leadership

Founder & President **May 2025 – Present**
Data Analytics Club *Rock Island, IL*

- Founded the club and scaled it to **100+** members, managing the executive team and budget.
- Ran **15** events in the first year, including SQL, Python, and AI workshops, with guest speakers from **Meta** and **John Deere**.
- Led a team to win **Best Insight / Best Data Visualization** at the ASA inter-college competition.

Lead Organizer
HackAugie Hackathon *Rock Island, IL*

- Designed the data challenge and datasets for a two-day multidisciplinary hackathon, structuring data roles across teams.
