Education

Augustana College Aug 2023 – Dec 2026
B.A. in Data Science & Neuroscience *Rock Island, IL*
Relevant Coursework: Machine Learning, Data Engineering, Data Structures & Algorithms, Probability & Statistics, Experimental Design
Honors: Best Insight, ASA DataFest Inter-College Competition (2025) | Dean's List (Fall 2023 – Spring 2025)

Technical Skills

Languages: Python, SQL, Java, JavaScript/TypeScript, Swift
Data & Machine Learning: scikit-learn, pandas, NumPy, feature engineering, data mining, model evaluation (ROC, precision–recall), predictive modeling
Cloud & Data Tools: AWS, Azure Databricks, Supabase (PostgreSQL), Tableau, Power BI, Git/GitHub, Jupyter, Vercel
AI Tools: LLM-assisted workflows, prompt engineering, GitHub Copilot, AI-assisted data cleaning

Experience

Data Analyst Mar 2025 – Present
John Deere *Moline, IL*
- Built the first tool portfolio for the supplier transition by pulling scattered supplier files into one usable dataset for stocking and launch decisions.
- Cleaned messy inherited product content across **7** languages with an LLM-assisted workflow, fixing HTML, unclear wording, and inconsistent descriptions before launch.
- Built the scoring logic for supplier evaluation, comparing **8** vendors on price, lead time, and defect rates to support a **$2.2M** transition decision.
- Replaced manual part-number lookups with a Databricks SQL workflow, cutting search time by **80%** and reducing support tickets by **∼35%**.
- Found where customers were dropping off on the new supplier site and worked with software and UX teams to ship fixes that improved conversion.

Data Science Intern May 2026 – Aug 2026
Institutional Research, Augustana College *Rock Island, IL*
- Helped the college identify students who needed academic support earlier by building a predictive model with **85%** accuracy and **0.84** recall.
- Engineered features from grades, high school background, and student records to flag **300+** students at academic risk.
- Turned scattered student records into a SQL-based pipeline, cutting data-prep time by **60%** and making reporting easier.
- Built Tableau dashboards and presented findings to senior leadership, helping inform changes to the student support system.
- Mapped academic outcome gaps across student groups so support teams could see where earlier outreach was needed.

Product Analyst May 2024 – May 2026
OSL, Augustana College *Rock Island, IL*
- Built the data pipeline behind Vike App, tracking sign-ups, event check-ins, attendance, retention, club activity, and failed check-ins.
- Helped launch analytics for **2,000+** students, giving campus teams cleaner engagement data than manual spreadsheets.
- Built reporting around retention and event attendance to show which clubs and programs were reaching students.
- Turned engagement data into recommendations that improved event visibility and helped guide student-programming budget decisions.

Projects

SaaS Churn Prediction | *Python, scikit-learn* link
- Built a churn prediction model with **0.86** AUC, using product usage and engagement patterns to flag customers likely to leave.
- Engineered behavioral features from login activity, onboarding, support tickets, and subscription data to explain churn risk.

Alzheimer's Disease Screening Model | *Python, scikit-learn* link
- Built a machine learning screening model on biomedical datasets to flag early Alzheimer's risk, targeting patterns **2–3 years** before symptom onset.
- Performed feature selection and compared Logistic Regression and Random Forest models using ROC and precision–recall curves to choose the best model for screening decisions.

Nibbles | *React, TypeScript, Supabase* link
- Built a personalized recommendation engine on the Open Library API driven by per-user rating and quiz signals, within a full-stack social reading app used by **57** real users.
- Owned the product end to end: Supabase PostgreSQL data model with row-level security, UI/UX iteration, and Vercel deployment.

Leadership

Founder & President May 2025 – Present
Data Analytics Club, Augustana College *Rock Island, IL*
- Founded and scaled the club to **100+** members, managing the executive team and budget; led a student team to win Best Insight at ASA DataFest (2025).

Resident Advisor Aug 2025 – Present
Office of Residential Life *Rock Island, IL*
- Mentor **90+** residents and designed community events, using feedback-driven programming to boost engagement and belonging.
